

WILEY

Why publish open access in a hybrid journal?

Publishing your work open access in a hybrid journal means it's available for anyone to read, use and build upon – enabling faster innovation, and removing barriers to readership

Hybrid open access journals accept both subscription and open access articles. When compared to subscription articles published by Wiley, open access articles in hybrid journals typically receive:

4.1x
Views

Hybrid open access articles are viewed more than four times compared to subscription articles

1.4x
Citations

Hybrid open access articles are cited +41% compared to subscription articles

4.8x
Altmetric

Hybrid open access articles receive almost five times as much Altmetric attention compared to subscription articles

1,300+

hybrid open access journals

Over 76,000

articles published open access in hybrid journals in 2025

120+

subjects

The benefits of hybrid open access are clear:

The same rigorous peer review process ensures trust in the value of your research

The Version of Record is maintained by the publisher, providing reliable up-to-date information on the article and its related assets

Wiley drives engagement and discoverability of your article

Assures you are compliant with funder mandates

You retain copyright through a [Creative Commons license](#)

Most open access requires an Article Publication Charge (APC) to be paid, which means the article can be made immediately and freely available.

However, many researchers are benefiting from open access funds provided by their institutions or other organizations. Visit our [Institutional Payments page](#) for more information on open access funds, or [check your eligibility](#).

Self-archiving policy

What about self-archiving?

Self-archiving allows an author to make a version of their subscription article available in an online repository.

- This does not require an APC, as the final version of the article is published as a subscription article
- You sign a [Copyright Transfer Agreement \(CTA\)](#) or an Exclusive License Agreement (ELA)

Self-archiving options vary but typically authors may archive the:

- Submitted version on acceptance
- Accepted version with a 12-24 month embargo period (depending on the journal's policy)

Note that self-archiving does not make the final version of your article freely available.

What are you waiting for?

When research findings are available to everyone, collectively we drive forward knowledge, discovery and invention on a global scale.
